

Western Solar

Renewable Energy Solutions

Designing Quality Solar Systems in Washington Since 1979

Spring & Summer Special – Made in Washington

**5250 watt solar electric system installed for
under \$30,503* after Federal Solar Tax Credits**

- Western Solar's 5.25 kW **Spring Special** is a 100% "made-in-the-USA" system designed to greatly reduce or eliminate your energy bill. It includes:

Silicon Energy 175 watt solar panels. These high efficiency modules (panels) are made in Washington and qualify for the maximum 36 cents per kilowatt hour annual production payment from your utility (compared to 15 cents with any other panels on the market). They carry a 20 year warranty.

Solectria PVI 5300 Inverter. Made in the USA with a 10 Year Warranty and a 95% conversion efficiency from the solar module's DC power output to your home's standard AC power.

Silicon Energy Integrated Roof Mount System. This mounting system conceals and protects wires for a clean aesthetically pleasing array that can stand strong wind loading. The system is attached with fully-flashed attachments to guarantee a completely watertight connection with your roof.

- With the new Economic Stimulus Legislation, your \$43,575 5.25 kW Western Solar System is eligible for a **30% Federal Tax Credit**, equal to \$13,073. With immunity to future increasing energy costs combined with your increased property value, you will receive an unbeatable tax-free return on your investment.
- In addition to saving you about **\$554/year in electric bills**, this 5.25 kW system is eligible to receive **Annual Production Incentive Payments of \$2,079/Year** from the Washington Department of Revenue for a total annual savings of about \$2,633.
- Upgrade to a Western Solar Premium System that features real-time internet monitoring on a customized website, giving you the ability to watch your savings and system performance from anywhere in the world, 24 hours a day.
- If you refer a friend, neighbor or relative who purchases one of our renewable energy systems, you are eligible for a referral fee of 1% per project.

* System price may vary depending on roofing type, required electrical panel upgrades, installation location and requested options.
